PROFILE

Talented Frontend Engineer with 2 years of professional experience building software solutions. Open-minded, easily adapting to changes, adopting new technologies, and interested in solving real-world problems with software.

EDUCATION

BSc in Geographic Information Systems, The University of Nigeria Nsukka

Statistical Computing, Probability & Inference, Remote Sensing and Aerial Photography, Cartography, Climatology, etc.

Diploma in Software Engineering, AltSchool of Engineering

Data Structures & Algorithms, Operating Systems, Technical Writing, Open-Source Contribution, Git, Digital Design, Programming, Deployment, etc.

EMPLOYMENT HISTORY

TECHNICAL SKILLS

JavaScript

React JS

Vue JS

Redux

Material UI

Bootstrap

Tailwind

Figma

Git

ArcGIS

QGIS

Frontend Engineering Intern at Kropmann Communications, Lagos

April 2022 — January 2023

- Build UI components in React.js to digitize the features of single-page applications
- Develop and maintain an efficient and testable code base for creating standard layouts
- Assist in integrating data from various backend services and databases.
- Set up automated Continuous deployment and integration pipelines with **GitHub Actions** to improve productivity by 23%.
- Contribute to stakeholder sessions on technological decisions, software design, architecture patterns, tools, and technologies for a 100% optimal solution.
- Liaise with Product Managers to identify and draft minimum viable product requirements and clearly translate features into well-scoped user stories for a 100% market-fit product.

CERTIFICATIONS

Genesys - Upskill Web Development

AWS – Cloud Practitioner

PMI- Fundamentals of Waterfall

Project Management

Fortinet – Network Security

Associate NSE1

Software Developer at Freelance, Remote

December 2021 — Present

- Engineer modern applications with JavaScript.
- Efficiently deploy and integrate software solutions to modern cloud environments such as Azure, Google Cloud and AWS increasing overall uptime by over 10%.

Software Engineering Student - AltSchool Africa

April 2022 — Present

Led a team of 4 to create Phonie, an application that allows users to enter their phone numbers into a form field and uses validation to proof-check numbers to determine the network provider.

- The project received positive feedback from the organization
- it was viewed by 1000+ software engineering students in the program.

SOFT SKILLS

Communication

Decision Making

Quick Learning Ability

★ PERSONAL PROJECTS

○ Glamz Editor – Web

Developed and Published Glamz, an image manipulator and editing app, using HTML, CSS, and JavaScript.
